Assignment A2: Gain Access to VM & run HDFS File Commands and Python code
Timothy Bailey
June 2, 2026

Discussion: In Part II Step 4, can you locate the file basket.txt? Which file is inside the HDFS and which file is outside the HDFS?

Currently I have the basket.txt located inside the HDFS and outside the HDFS. I used the scp command in my terminal to copy and move the file over from my home/tcbailey/practice_folder/ located in the IMSE 785 server. Using the command I was able to place the text file inside HDFS under /users/tcbailey/input_files/

This was my first time really diving into Hadoop and using Linux functions to move files between my local system and into multiple servers.
